

A NATURAL EXTENSION TO YOUR ARM!
...the new kwb range of screwdrivers for everyone.

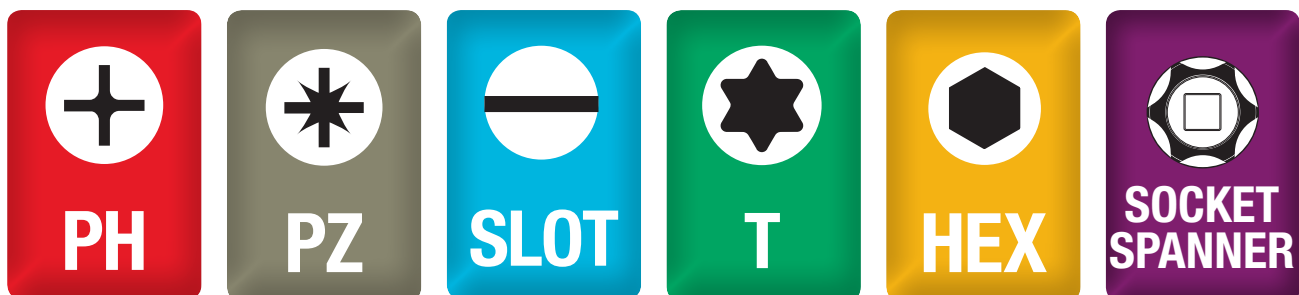

THE ADVANTAGES OF kwb SCREWDRIVERS

- CrV steel
- with 3-component grip for optimal power transfer and non-slip working
- blade CrV steel
- with chemically blacked precision tips
- VDE Screwdriver, VDE/GS tested
- quickly distinguishable colour code system
- practical screwdriver holder for the workshop, simply screw the plastic clip on the workshop wall

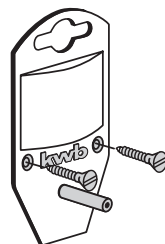

FIND THE APPROPRIATE SCREW SHAPE QUICKLY AND EASILY

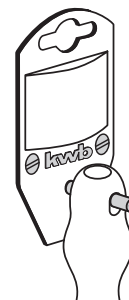

PACKAGING CLIP CAN BE USED AS CONVENIENT TOOL HOLDER

MUST HAVE

Simply fix the clip with 2 screws on the tool wall ...

... then hang up the screwdrivers - and have the right screwdrivers readily to hand!

RANGE OVERVIEW SREWDRIVERS

Engineer's screwdrivers

PROFESSIONAL ★★★★★

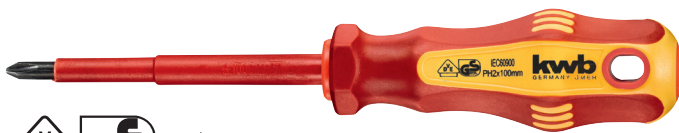

CrV steel, 3-component grip for optimal power transfer and slip-free working, blade CrV steel, matt chrome plated, with chemically blacked precision tips. Quickly distinguishable colour code system shows the desired blade shape. With practical screwdriver holder for the workshop, simply screw the plastic clip on the workshop wall.

Stubby screwdrivers

PROFESSIONAL ★★★★★

CrV steel, 3-component grip for optimal power transfer and slip-free working, matt chrome plated, with chemically blacked precision tips. Quickly distinguishable colour code system shows the desired blade shape. With practical screwdriver holder for the workshop, simply screw the plastic clip on the workshop wall.

1000 V

VDE screwdrivers

PROFESSIONAL ★★★★★

VDE certified, CrV steel, 3-component grip for optimal power transfer and non-slip working, blades fully insulated, with chemically blacked precision tips. Quickly distinguishable colour code system shows the desired blade shape. With practical screwdriver holder for the workshop, simply screw the plastic clip on the workshop wall.

Voltage tester

PROFESSIONAL ★★★★★

VDE GS tested, 150-250 volt, with visual indication, with clip, insulated head, insulated blade, for testing whether a voltage is present.

T-grip screwdriver

PROFESSIONAL ★★★★★

with hanger for the workshop wall, simply screw the plastic clip on the workshop wall. CrV steel, 2-component grip for high power transfer and slip-free working, chrome plated, short and long blade, for significantly more powerful working as compared to conventional screwdrivers. Colour code system on the package for easier allocation to different applications.

PROFI precision screwdrivers

PROFESSIONAL ★★★★★

Blades from CrV steel matt chrome plated, 2-component handle, with rotating top for optimal power transfer and easy working in precision engineering, with chemically blacked precision tips.

TECHNICAL TERMS

Identification

Symbol on the end of the handle shows the blade type and size.

Hanging hole

For space-saving and orderly hanging in the workshop. Distinguishable colour code system shows the desired blade shape.

Handle

3-component grip for optimal power transfer and non-slip working.

Colour coding system

Easily recognisable colour coding system instantly indicates the required blade type.

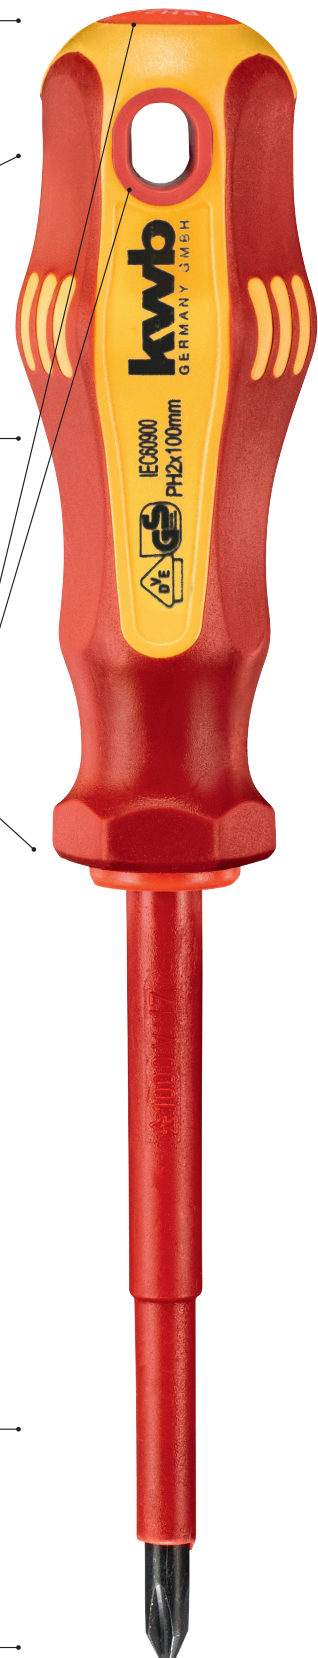

Insulation

All insulated screwdrivers are VDE/GS tested and conform to the standard IEC 60900:2004.

Blade

Chrome-vanadium (CrV) steel, matt chrome plated, with chemically blacked precision tips.

TECHNICAL TERMS

Design

The flat-headed rotatable top enables fine adjustment, particularly useful in precision engineering.

Colour coding system

Easily recognisable colour coding system instantly indicates the required blade type.

Handle

3-component grip for optimal power transfer and non-slip working.

Identification

Symbol on the end of the handle shows the blade type and size.

Blade

Chrome-vanadium (CrV) steel, matt chrome plated, with chemically blacked precision tips.

kwb Info

VDE insulation - safe working on live electrical installations

There are strict health and safety standards relating to work on live electrical installations, such as the German DIN VDE 0105 or the international EN 50110 as well as IEC 60364, kwb tools which bear the special ⚡ 1000 V symbol are authorised for live working use up to 1000 V AC.
