

COB / LED Lights

...for the best possible lighting conditions!

A new generation of lights

The new generation of lights from kwb Germany GmbH was developed to cover a wide range of applications. This means that kwb lights can be used under the most adverse conditions on construction sites, in workshops, in building services or even during leisure activities. What makes this possible is the ample range of fab features, smart detailed solutions and extensive variants and sizes (e.g. flood lights, head lights, pen lights and torches, etc.).

The modern **lithium-ion batteries with up to 6700 mAh** provide excellent support for mobile working. They can be charged using the supplied USB cable. Discharge protection, overcharge protection and the automatic, temperature-dependent charge stop guarantee maximum safety during operation. Some of the LED lights can even be used as a power bank to charge other devices with a USB interface (e.g. mobile phones).

The new generation of kwb lights with a luminous flux of **up to 1521 lm** and **up to seven light modes** adapts to every situation. The flexibly adjustable housing positions are used to provide illumination in almost every working environment and an extremely wide range of leisure activities performed in the dark. For example, some lamps of the new generation of kwb lights can even be mounted on standard tripods or held magnetically on surfaces that are sensitive to scratching, since they are equipped with a special **No-Scratch seal** in the magnet area.

kwb lights give peace of mind when they're used to provide safety in dangerous situations. Depending on the intended application, kwb lights are equipped with **red light** to preserve the eyes' ability to see in the dark and ensure that people will still be capable of taking action in dangerous situations.

Highlights

- Modern Li-ion batteries with up to 6700 mAh and automatic charge protection for safe operation
- Extremely robust and flame-retardant housing with flexible positioning and mounting options
- Dust-proof and jet-proof
- Up to 1521 lm and with up to seven light modes
- A wide range of lighting functions: surface light, torch, hazard warning light and red light

The categories

Work lights with Li-Ion battery

The category of the work lights comprises in particular the models guaranteeing a large-scale, uniform and extremely bright illumination without having to be held with your own hands. The kwb work lights have at least always two different holding functions for diverse surfaces and are thus predestined for use on construction sites, workshops, in building services or in your free time.

battery powered work lights

Obviously, all kwb models are also suited for outdoor use, in this category there are special lights, which, due to their functions, shape and quality, are ideal companions for all outdoor activities.

Explanation: pictograms

 COB Chip on board	 80 LUMEN Light output	 LOW Low luminosity
 LED Light-emitting diode	 1,5W LED LED watt display	 MEDIUM Medium luminosity
 CE CE mark	 3,3W COB COB watt display	 HIGH High luminosity
 Magnetik	 1h 30min Burn time	 POWER Extremely high luminosity
 Motion sensor (on/off)	 MODUS 2 Light variations	 RED LIGHT Red light
 USB USB plug connection	 0-100% Dimmable	 BLINK Flashing light
 2h 30min Charging time	 180° Swiveling 180° around its own axis	 STROBE Stroboscope light
 Li-Ion 1500 mAh Li-Ion battery capacity	 180° Swiveling 180°	 ZOOM ZOOM light
 POWER BANK 5V/1A Power Bank output	 NO SCRATCH Scratch protection	 SOS SOS light
	 IP 20 IP Protection class	 MORSE Morse light

Der ANSI FL-1 Standard

FL 1 STANDARD **Beam Distance**

Describes the distance at which 0.25 LUX can still be measured in the light beam of the (focused) flashlight. This value can be compared with the light of the full moon on the ground when the night sky is clear.

FL 1 STANDARD **Impact Resistance**

Details in metres of the result of the drop test (carried out 6 times, concrete surface) where the flashlight remains fully functional and visually intact.

FL 1 STANDARD **Peak Beam Intensity = Maximum luminous intensity**

Measurement of the maximum luminous intensity in the centre of the light beam and thus particularly relevant in the rating of classic flashlights with selective illumination. The value is indicated in candela. It can be compared to the light of a candle – we talk about 1 candela here.

FL 1 STANDARD **Water Resistance**

This logo equates to the protection class test IPX4 and is thus protected from water splashes. The light is exposed to a jet of water from all sides for at least 5 minutes, and it must work both immediately after the test and also 30 minutes after without any limitations.

FL 1 STANDARD **light performance / luminous flux / total amount of light = Lumen Logo**

The lumen output refers to the measured, total light performance of the flashlight. Here the luminous flux in the entire illumination field is measured and rated

FL 1 STANDARD **Run Time**

Classic test of the run time of a battery charge. The measurement is effected from switching on the light until the time when the light output has reduced itself to only 10% of the starting value and the user replaces the batteries.

WORK LIGHTS

...with Li-Ion battery!

Hexagonal floodlight

PROFESSIONAL ★★★★★

The robust and flame-retardant hexagonal kwb floodlight enables mobile working under the most adverse conditions. The extremely long-life luminaire is dust-proof, protected against water jets and produces an extra large, homogeneous light cone in three light modes. **The lithium-ion rechargeable battery is perfectly protected due to the integrated overcharge and discharge protection as well as the temperature monitoring.** The spot-light can be set down, hung up so that it can be swivelled through 180° and mounted on standard light tripods. A USB charging cable (power plug not included) is supplied.

- SMD LED with max. 1277 lm luminous flux
- Lithium-ion rechargeable battery with 5200 mAh
- Surface light with no hot spot formation
- Extremely robust housing
- Flame-retardant housing material

Art.-Nr.	Description			Barcode
948800	kwb hexagonal floodlight		2	4 009319 488000

Large floodlight

PROFESSIONAL ★★★★★

The robust kwb floodlight enables mobile working under the most adverse conditions. The flame-retardant, dust-proof luminaire that's protected against water jets generates the white or red light cone that's a handy help with certain tasks in six light modes. It can also be used as a powerbank. **The lithium-ion rechargeable battery is perfectly protected due to the integrated overcharge and discharge protection as well as the temperature monitoring.** The spotlight can be swivelled through 180° in its base, mounted on a camera tripod or hung up using the magnet or carabiner hook. A USB-C charging cable (power plug not included) is supplied.

- COB LED with max. 1521 lm luminous flux
- Lithium-ion rechargeable battery with 6200 mAh
- Red and white surface light with no hot spot formation
- Powerbank function
- Flame-retardant housing material

Art.-Nr.	Description			Barcode
948920	kwb large floodlight		2	4 009319 489205

kwb small floodlight

PROFESSIONAL ★★★★★

The robust and flame-retardant kwb floodlight enables mobile working under the most adverse conditions. The extremely long-life luminaire is completely dust-proof, protected against water jets and produces an extra large, homogeneous light cone in five light modes. **The lithium-ion rechargeable battery is perfectly protected due to the integrated overcharge and discharge protection as well as the temperature monitoring.** The spotlight can be swivelled through 240° in its base or hung up using a magnet or carabiner hook. A USB charging cable (power plug not included) is supplied.

- COB LED with max. 357 lm luminous flux
- Lithium-ion rechargeable battery with 2000 mAh
- Surface light with no hot spot formation
- Robust housing
- Flame-retardant housing material

Art.-Nr.	Description			Barcode
948910	kwb small floodlight		2	4 009319 489106

Small inspection lamp

PROFESSIONAL ★★★★★

The robust, flame-retardant and long-life kwb inspection lamp featuring an integrated torch was developed for workshops and building services. It is dust-proof, protected against water jets and produces the required light cone in white or red (with hazard warning light function) in seven light modes. **The lithium-ion rechargeable battery is perfectly protected due to the integrated overcharge and discharge protection as well as the temperature monitoring.** The kwb inspection lamp can be swivelled through 180° and can be positioned with a hanging hook and magnet. A micro USB charging cable (power supply unit not included) is supplied.

- COB LED with max. 547 lm luminous flux
- Lithium-ion rechargeable battery with 2000 mAh
- Red and white surface light with no hot spot formation
- Flexibly positionable inspection lamp
- Flame-retardant housing material

Art.-Nr.	Description			Barcode
949110	kwb small inspection lamp		2	4 009319 491109

kwb large and foldable inspection lamp

PROFESSIONAL ★★★★★

The robust, flame-retardant and long-life kwb inspection lamp featuring an integrated torch was developed for workshops and building services. It is dust-proof, protected against water jets and produces an extra large light cone in two light modes. **The lithium-ion rechargeable battery is perfectly protected due to the integrated overcharge and discharge protection as well as the temperature monitoring.** The kwb inspection lamp can be positioned with a hanging hook and magnet. A micro USB charging cable (power supply unit not included) is supplied.

- COB LED with max. 648 lm luminous flux (infinitely dimmable)
- Lithium-ion rechargeable battery with 2600 mAh
- Extremely bright white surface light with no hot spot formation
- Flexibly positionable inspection lamp
- Flame-retardant housing material

Art.-Nr.	Description			Barcode
949200	kwb large and foldable inspection lamp		2	4 009319 492007

kwb pen light with seven SMD LEDs

PROFESSIONAL ★★★★★

The kwb pen light is ideal for applications where a small but bright light source is required. The rechargeable battery is recharged with a micro USB cable; a mobile phone charger is also suitable to meet this need. The kwb pen light featuring seven LEDs brightens up the workplace, whether it's being held in your hand or attached using the strong magnet. The housing is sealed. So dirt is kept out. **The lithium-ion rechargeable battery of the kwb lamp is equipped with overcharge and discharge protection as well as temperature monitoring that interrupts the charging process if the ambient temperature is too high or too low.**

- SMD LED with max. 131 lm luminous flux
- Lithium-ion rechargeable battery with 750 mAh
- Magnet and clip
- Extremely robust housing
- Flame-retardant housing material

Art.-Nr.	Description			Barcode
949400	kwb pen light with seven SMD LEDs		2	4 009319 494001

kwb work light with 4 W COB LED

PROFESSIONAL ★★★★★

The dust-proof and splash-proof kwb work light with 4 W LED is ideal for areas of use where small but bright sources of light are needed – either hung up on a fold-out hook or attached using a strong magnet. **The lithium-ion battery of the kwb lamp, which can be recharged with a mobile phone charger and a micro USB cable, is equipped with overcharge and discharge protection as well as temperature monitoring that interrupts the charging process if the ambient temperature is too high or too low.**

- COB LED with max. 422 lm luminous flux
- Lithium-ion rechargeable battery with 2600 mAh
- Swivelling
- Dust-proof and splash-proof
- Flame-retardant housing material

Art.-Nr.	Description			Barcode
949300	kwb work light with 4 W COB LED		2	4 009319 493004

Area light

PROFESSIONAL ★★★★★

LED	0-100%	180°	IP 54	NO SCRATCH	Li-Ion 5200 mAh
29m	204 cd	999 LUMEN	1m	2h 30min	4 h
FL 1 STANDARD			POWER BANK 5v/2A		

The kwb area light is ideal for applications where a small but bright light source is required to light up the working environment. **The rechargeable battery is recharged with a micro USB cable; a mobile phone charger is also suitable to meet this need.** If you need to charge your mobile phone, the integrated powerbank supplies a 2 A charging current. The kwb area light with SMD LED brightens up the workplace, whether it's hanging on the fold-out hook, attached using the strong magnet, or simply put in position. Even dust and splash water cannot adversely affect the kwb area light.

- SMD LED with max. 999 lm luminous flux (infinitely dimmable)
- Lithium-ion rechargeable battery with 5200 mAh
- Swivelling and integrated powerbank
- Dust-proof and splash-proof
- Flame-retardant housing material

Art.-Nr.	Description			Barcode

3W head light

PROFESSIONAL ★★★★★

The robust, flame-retardant and long-life kwb 3 W head light was developed for workshops and building services. It is dust-proof, protected against water jets and produces the required light cone in two light modes. A motion sensor enables contactless operation. **The lithium-ion rechargeable battery is perfectly protected due to the integrated overcharge and discharge protection as well as the temperature monitoring.** The kwb inspection lamp can be swivelled vertically and is extremely comfortable to wear due to a padded headband. A micro USB charging cable (power supply unit not included) is supplied.

- COB LED with max. 294 lm luminous flux
- Lithium-ion rechargeable battery with 1500 mAh
- Bright surface light with no hot spot formation
- Can be contactlessly switched on and off
- Flame-retardant housing material

Art.-Nr.	Description			Barcode

LED TAC Light, 9 cm, 1 Watt

PROMO

The handy variant of the flashlight with original Taiwanese "EPISTAR" 1 Watt LED. A 2 mm impact-proof ABS housing ensures the right accommodation of technology and thanks to the wrist strap you will no longer lose the flashlight. This 9 cm long and only 2.5 cm wide flashlight is ideal for on the go and can be stored even in the smallest of bags, whilst delivering an enormous power for its size when needed. The light effect is characterised both by a large-scale illumination at close and medium range and a focused spot further away. This feature makes the flashlight a real all-rounder. This is guaranteed by the optimally ground and break-proof lens. Energy supply by means of 2x 1.5 Volt AAA batteries (included in scope of delivery).
